Re: Regency Model numbers: Certificate # 73-16 MODEL: F1500/I1500

Please accept this application for a Certificate renewal of the F1500/I1500 wood heater, certificate number 73-16.

The expiry date is **Jan 9, 2022**.

The heaters in the above model line continues to be manufactured similar in all material respects that would affect emissions (no changes to the K list components) to the representative model submitted for testing on which the original certificate of compliance was based.

There have been no changes to K list components that would affect combustion and we are requesting a waiver from certification testing.

Further to this letter is our original certificate of certification and confirmation from the certifying test lab PFS-Teco as to the validity of the report as updated on 28th May 2021.

Please advise if you require any further information.

Sincerely,

Julian Mills
Director, Product Design
